:30 Sales Pitch: How To Sell EcoNet™

The EcoNet Smart Home System provides advanced air & water control for maximum energy savings and ideal comfort.

Benefits for Contractors:

Automated Installation - Automatically detects equipment for hassle-free installation.

Simplified Service - Descriptive alerts identify components requiring attention.

Customer Relationships - Contractor contact information automatically displays in EcoNet app when equipment alerts occur.

Benefits for Homeowners:

Comfort - Monitors and adjusts connected air and water systems to create a homeowner's ideal environment.

Savings - Puts complete control of up to 65% of home energy use in one place, allowing homeowners to manage energy consumption like never before.

Convenience - With the Control Center's simple touch screen interface, mobile-friendly web portal, and mobile apps, it has never been easier to make temporary modifications, create weekly schedules, or plan for vacations.

Peace of Mind - From maintenance reminders to critical alarms, it ensures homeowners are notified any time air and water systems require attention.

The mobile apps & mobile-friendly web portal are powerful—and absolutely free.

The Rheem EcoNet app is available for Apple® & Android™ mobile devices.

Introducing EcoNet™

For nearly a century, Rheem has been at the forefront of home comfort technology, offering innovative solutions that fit the way homeowners live. Now we are delivering an advanced level of convenience and efficiency for homeowners while helping contractors achieve a higher level of sales and service.

EcoNet is smart, new technology developed exclusively by Rheem that allows Heating, Cooling, and Water Heating products to communicate with each other on one integrated network.

Control On-the-Go

EcoNet WiFi Kit

EcoNet Control Center

By bringing your air and water systems together, EcoNet makes it easier than ever for homeowners to save energy and achieve that perfect temperature—all while giving you the diagnostics you need to deliver that perfect level of service.

EcoNet™ Smart Home System

Available on the App Store | Available on Google play

Apps & Mobile-Friendly Web Portal

Used to remotely program and make setting adjustments on EcoNet Enabled systems. Also provides notifications for maintenance reminders and equipment alarms.

Note: Requires use of appropriate WiFi Kit. See below.

Control Center

Required to operate an EcoNet Enabled Heating and Cooling system. The Control Center also works with EcoNet Enabled Electric and Hybrid Tank Water Heaters and is compatible with *Comfort Control System™* Air Conditioner and Heat Pump models, when matched with an EcoNet Enabled Gas Furnace or Air Handler.

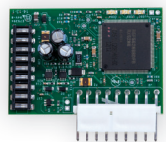

WiFi Kits

Required to operate EcoNet air & water systems remotely from the EcoNet web portal and mobile apps.

- EcoNet WiFi Kit for Heating & Cooling
- EcoNet WiFi Kit for Electric & Hybrid Water Heaters
- EcoNet WiFi Kit for Gas Water Heaters
- EcoNet WiFi Kit for Pool Heaters**

Note: Kit contents optimized for each application.

CC² Translator

Required to enable *Comfort Control System* outdoor Air Conditioner and Heat Pump products to fully communicate with an EcoNet Enabled Gas Furnace or Air Handler.

Outdoor Temperature Sensor

Recommended for installations of EcoNet Enabled Gas Furnaces or Air Handlers when combined with non-communicating Air Conditioners or Heat Pumps. Supports a Dual Fuel system, and displays the outdoor temperature on the Control Center.

How It Works

*If your EcoNet Enabled Electric Water Heater is wired to your EcoNet Enabled Heating & Cooling system, only one EcoNet WiFi Kit (Kit for Heating & Cooling or Kit for Electric Water Heaters) is necessary for connecting the products to the mobile apps and mobile-friendly web portal.

**Coming soon.
