\*This furnace contains an "advanced main air circulating fan". IRC Section 25C, as amended by the American Recovery and Reinvestment Act of 2009 (ARRA), provides a tax credit equal to 30 percent of the cost of installation of an advanced main air circulating fan that is used in a natural gas, propane or oil furnace. As furnace fans are not separately invoiced as a furnace component, the Manufacturer has determined that the tax credit amount shown is representative of the tax credit amount that can be claimed on the installed cost of a furnace containing an "advanced main air circulating fan." Please consult with your tax advisor to determine what, if any, tax credit may be available to you.
