

Heat Pump

Value Series | Model: 13PJA 13 SEER Heat Pump

When you look at the benefits provided, you'll see that you can depend on Rheem Heat Pumps to deliver the quality and value you expect.

- **Durability for Years to Come**

While blending effortlessly into your home's landscape, the attractive, low-profile, louvered, *Neutra Green™* steel cabinet provides style and protection from yard hazards and weather extremes. With this durable construction, you can count on years of ease when you depend on Rheem for your home comfort needs.

- **Tranquility of Quiet Operation**

Air is discharged through a unique grille pattern located on top of the unit, and is directed upward and away from bushes and shrubs. This discharge pattern allows for quiet fan operation and low noise levels, which *you and your neighbors* will appreciate.

- **Simple, Low Cost System Maintenance**

Contractor-preferred access, to the internal components of the unit, is easily obtained by removing one service panel or the top grille, keeping service time and expense to an absolute minimum. This enhanced serviceability makes caring for your system as easy as 1-2-3.

- **Efficient Performance Maximizes Savings & Comfort**

The 13PJA model features cooling efficiencies up to 14 SEER/13.25 EER, and heating efficiencies up to 8.2 HSPF. The higher the SEER level, the greater your energy savings will be over time. When compared to lower SEER rated models, choosing a higher efficiency model will pay off with years of savings on your monthly energy bills.

- **Guaranteed Dependability**

The 13 SEER model features a five-year limited compressor warranty, while all other parts have a five-year limited warranty. You can relax and simply enjoy the peace of mind you deserve with the worry-free operation of your Rheem Heat Pump.
