

Model: GF801D*X13 80 % Downflow/Horizontal Gas Furnace with an ECM X-13 Motor

Features & Benefits:

- **Super-Quiet Design.** To help improve the sound quality, we re-engineered the door and top-plate to provide a sound barrier between the furnace's operation and your home.
- **Heat Exchanger.** The heat exchanger is renowned for its dependability and efficiency. It's constructed of aluminized and stainless steel for maximum resistance to rust and corrosion. And it's backed by a 20-year limited warranty.
- **Induced Draft Motor.** The draft inducer quietly provides air for combustion while simultaneously venting outdoors the products of combustion from the furnace heat exchanger.
- **Gas Valve.** The redundant gas valve is a 24-volt slow-opening valve that delivers gas in a regulated flow to the patented "in-shot" burners.
- **In-Shot Burners.** The natural (or optional LP) gas is ignited by the direct spark ignition at the in-shot burners. The in-shot burner's shutter-free design requires no adjustments to regulate the air/gas mixture.
- **Direct Spark Ignition.** Direct spark ignition is an extremely dependable and efficient way to light the burner. And it eliminates the need for a standing pilot. For added safety, the remote flame sensor constantly monitors the burner flame to ensure it is operating as it should.
- **Adjustable Air Speed.** Thanks to adjustable controls for the blower, your contractor can precisely match airflow to the specific comfort requirements of your home.
- **Integrated Furnace Control.** The "Brain" is the Integrated Furnace Control (IFC) which directs all activities of major furnace components. Built-in diagnostics allow for quicker & easier service calls, saving you valuable time & money. The control features low-speed continuous fan operation and accessory terminals for less expensive installation of additional Indoor Air Quality (IAQ) Products.
- **Easy Access Washable Filter.** The furnace is equipped with a permanent, washable filter that's easy to access and clean. You won't ever have to deal with the hassle and expense of replacement filters.
- **ECM X-13 Blower Motor.** Airflow control is one of the most important factors in maintaining the comfort level in your home. Sure Comfort is pleased to offer the ECM X-13 Blower Motor that allows you to experience maximized comfort benefits and exceptional energy savings without having to pay top dollar. Designed to meet your comfort requirements, warmth is delivered throughout your home fast when needed.

• **Heating Capacities from
50,000 to 125,000 BTU/Hr**

Limited Warranty:

- Parts – 5 Years
- Heat Exchanger – 10 Years

Real People. Real Savings. Real Fast.
