

Rheem Solar & Tankless Water Heaters that Qualify for the New Federal Economic Stimulus Package Tax Credits

Federal Energy Tax Credits for Rheem Solar and Tankless Water Heaters, February 2009.

The new federal tax credits apply to a selected group of water heaters. Tankless products must be installed in existing homes (primary residence) to qualify. Solar products can be installed in either new construction or existing homes to qualify. Check with your tax advisor for details. Only some Energy Star® water heaters have been designated for federal tax credits, not all. However, keep in mind that all Energy Star models are highly energy efficient and may be eligible for state and utility incentives and rebates. To obtain other potential rebates and incentives, check with your local gas or electric utility and visit www.dsireusa.org for more state and regional information.

Federal Program	All solar tanks and systems above qualify for the new Federal Energy Tax Credits in <u>existing</u> or <u>new</u> residential construction. Stimulus Bill details: Tax credit up to 30% of the cost of equipment and installation. Qualified Dates: Installations from 2/17/2009 through 12/31/2016. Note: No maximum tax credit cap for residential solar equipment and installation		All tankless models above qualify for the new Federal Tax Credits in <u>existing</u> residential construction. Tax credit applies to primary residence only. Stimulus Bill details: Tax credit up to 30% of the cost of equipment and installation. Qualified Dates: Installations from 1/1/2009 through 12/31/2010. The tax credit can be claimed in either year or be split up between the two years. Note: Maximum tax credit cap for each home is \$1500.	
Other Programs	Other state or utility incentives and rebates may also apply. Rheem solar products are <i>pending</i> Energy Star qualification due to delay of SRCC OG-300 certification. 		Other state or utility incentives and rebates may also apply. All Rheem tankless residential tankless water heaters are Energy Star qualified. 	

Energy Star Qualified Tank Water Heater, January 2009.

While many Rheem gas tank water heaters qualify for an Energy Star rating, *only solar and tankless qualify for Federal Tax Credits*. Energy Star tank models offer a low cost, green solution when replacing an existing gas tank water heater.

While many Rheem gas tank water heaters qualify for an Energy Star rating, only solar and tankless products qualify for Federal Tax Credits. Energy Star tank models offer a low cost, green solution when replacing an existing gas tank water heater. Note: At this time, there are no electric tank water heaters from any manufacturer that have been Energy Star qualified.
Other state or utility incentives and rebates may also apply. The selected group of gas water heaters above are Energy Star qualified.
