

High Altitude Applications for GN (Low NOx) and GX (Xtreme) Series

The instructions in the Use & Care Manual supplied with the water heater should be followed in addition to the following Instructions for the GN76-200H, GN91-200H, GN100-200H and GX90 High Altitude models.

1. The following water heater models are certified for installations at elevations between 2,000 and 5,000 feet with no change in construction (i.e. no change in orifice size):

GN76-200H
GN91-200H

Installations above 5,000 feet are not permitted. Failure to comply will result in improper and inefficient operation of the appliance, producing carbon monoxide gas in excess of safe limits, which could result in serious personal injury or death.

2. The following water heater models are certified for installations at elevations between 2,000 and 8,000 feet with no change in construction (i.e. no change in orifice size):

GN100-200H
GX90-715(A)H
GX90-680(A)H
GX90-640(A)H
GX90-600(A)H
GX90-550(A)H
GX90-500(A)H

Installations above 8,000 feet are not permitted. Failure to comply will result in improper and inefficient operation of the appliance, producing carbon monoxide gas in excess of safe limits, which could result in serious personal injury or death.
