

Home Generator Systems

GenAlert™ & GenAlert™ Plus

RHEEM

Remote Generator Monitoring Systems

Rheem®, a trusted brand for over 80 years, is proud to offer the GenAlert™ and GenAlert™ Plus remote generator monitoring systems. Whether you are on vacation or away on business, these systems monitor the SEREGEN™ Series home generators' performance— automatically notifying you via telephone if a problem has occurred. The GenAlert Plus adds comfort to the equation allowing you to also quickly check current temperature or power status, and even pre-heat your home or cabin from any phone in the world. Make your own electrical power automatically with a Home Generator System from Rheem. It's like having your own personal backup power plant.

GENALERT™ FEATURES & BENEFITS

- Customer Direct 24/7 Monitoring**
 Pre-recorded greeting automatically calls direct to the customer without the need for 3rd party call support.
- Remote System Status**
 Automatically alerts you anywhere you travel.
- Versatile Protection**
 Capable of connecting to multiple pieces of equipment/alarm contacts.
- Fast Installation**
 Works out of the box with your generator & existing phone line.
- No Hidden Costs**
 No monthly fees or installation costs — just plug in and relax!

GENALERT™ PLUS FEATURES & BENEFITS

SET UP FOR ADDITIONAL MONITORING FEATURES

- Deluxe 24/7 Monitoring**
 User-recorded greeting calls up to three phone numbers direct for an immediate, robust response to a temperature/backup power emergency.
- Quick Status Check**
 In addition to automatic outbound alerts, allows you to quickly check current temperature or power status from any phone in the world.
- Advanced Temperature Controls**
 In addition to generator performance, remotely controls both high/low temperatures simultaneously— perfect for monitoring a deep freezer, walk-in cooler, floral cooler, green house, and garage.
- Remote Comfort PreSets**
 Preheat your home or cabin with a phone call (additional thermostat required).
- Easy To Install**
 Works with answering machines or voice mail at the monitored location and can leave messages.
- Nuisance Delay**
 Select the amount of time the power needs to be out before sending alerts.
